

Compression spring - standard tension

The Nemtek compression spring standard is used to maintain a constant tension on the electric fence wires. Wire tension on an electric fence will vary over time and the springs will maintain a constant force on the electric fence wires to keep them neat.

Features:

- A nylon plastic inner which eliminates galvanic reaction between dissimilar metal thus reducing rust and increasing the life of the wire
- Can be used with any type of Nemtek electric fence wire
- Standard tension (silver) spring which can tension 1.2 mm wires

Specifications:

Material: Stainless steel spring and UV stabilised nylon inner.

Colour: White and black

Spring tension maximum: 5kg

Operating temperature: -40 to 80 Celsius

Operating voltage: 0- 12KV

Recycling: SPI resin code 7
